

Compact Slide

MXH Series

ø6, ø10, ø16, ø20

RoHS

Allowable moment
Improved
by up to
240%

With new high rigidity linear guide

Allowable moment improvement
illustrated below*

* Allowable moment caused by static load
(The above graph is a comparison between the new MXH and the current MXH6.)

Weight **19% reduced** (ø20-10 stroke)
 Current model **455g** → MXH **369g**

The weight has been reduced by incorporating
a new high rigidity linear guide and piston.

High rigidity achieved with new circulating type linear guide

High allowable moment

Pitch Moment (N-m)

Bore size (mm)	MXH	MXH existing model
6	0.81	0.47
10	1.69	0.96
16	3.49	1.88
20	5.86	3.14

Yaw Moment (N-m)

Bore size (mm)	MXH	MXH existing model
6	0.81	0.39
10	1.69	0.82
16	3.49	1.59
20	5.86	2.75

Roll Moment (N-m)

Bore size (mm)	MXH	MXH existing model
6	1.4	0.59
10	3.19	1.37
16	6.47	2.75
20	11.66	5.49

* Selection of a bore size cannot be made only with above allowable moment.
Select a bore size in accordance with "Model Selection" on pages 17 and 18.

Traveling parallelism is the same as the existing model.

Deflection at the extended position of the table is the same as the existing model.

Traveling parallelism	Stroke (mm)	
	5 to 30	40 to 60
	0.05 mm or less	0.1 mm or less

* Values when no load and no pressure applied.

Small auto switches capable

(D-M9□, D-A9□)

Mounting is completely interchangeable with existing model.

Dimensions including workpiece mounting dimensions and cylinder mounting dimensions are the same as the existing model.

Mounting is possible in 4 directions.

Piping is possible in 3 directions.

If changing the port location, "Made to Order" model (-XC3□) is available.

Application Example

Useful when long stroke/travel is required

Series Variations

Model	Standard stroke (mm)									Made to Order
	5	10	15	20	25	30	40	50	60	
MXH6	●	●	●	●	●	●	●	●	●	-XC79 : Machining tapped hole, drilled hole and pin hole additionally -XB13 : Low speed cylinder (5 to 50 mm/s) -XC3□ : Special port location -XC19 : Intermediate stroke (Spacer type) -XC22 : Fluororubber seal
MXH10	●	●	●	●	●	●	●	●	●	
MXH16	●	●	●	●	●	●	●	●	●	
MXH20	●	●	●	●	●	●	●	●	●	
	●	●	●	●	●	●	●	●	●	

MXH Series Model Selection

⚠ Caution Confirmation of theoretical output is required separately. Refer to "Theoretical Output" on page 20.

Selection Conditions: Follow the tables below in order to determine selection conditions and choose one selection graph.

Mounting orientation	Vertical			Horizontal								
												
Maximum speed (mm/s)	Up to 100	Up to 300	Up to 500	Up to 100			Up to 300			Up to 500		
Load eccentricity L ₁ (mm)	—			50	100	200	50	100	200	50	100	200
Selection graph	1	2	3	4	5	6	7	8	9	10	11	12

* L: Overhang (the distance from the cylinder shaft center to the load center of gravity)

The direction of L can also be a diagonal direction. (Refer to the drawing at right.)

* H: Distance from the cylinder center axis to the mounting surface for the table

	MXH6	MXH10	MXH16	MXH20
H dimension (mm)	24.5	30.5	34.5	41.5

Selection Graph 1 to 3 (Vertical Mounting)

Graph 1 Maximum Speed 100 mm/s or Less

Graph 3 Maximum Speed 500 mm/s or Less

Graph 2 Maximum Speed 300 mm/s or Less

Selection Example (Vertical Mounting)

1. Selection conditions
- Mounting: Vertical
 - Maximum speed: 500 mm/s
 - Overhang L: 40 mm
 - Load mass m: 0.1 kg

Refer to Graph 3 based on vertical mounting and a speed of 500 mm/s.

In Graph 3, find the intersection of a 40 mm overhang L and load mass m of 0.1 kg, which results in a determination of ø16.

			2-wire	24 V	12 V	100 V or less	A90V	A90	●	—	●	—	—	IC circuit		

*1 Water resistant type auto switches can be mounted on the above models, but in such case SMC cannot guarantee water resistance.

Please consult with SMC regarding water resistant type with the above model numbers.

*2 1 m type lead wire is only applicable to D-A93.

* Lead wire length symbols: 0.5 m Nil (Example) M9NW
1 m M (Example) M9NWM
3 m L (Example) M9NWL
5 m Z (Example) M9NWZ

* Solid state auto switches marked with "○" are produced upon receipt of order.

* Refer to page 28 for applicable auto switches other than listed above.

* For details about auto switches with pre-wired connector, refer to pages 1192 and 1193.

* Auto switches are shipped together, (but not assembled).

Note 1) Negative figures in the table W indicate that an auto switch is mounted inward from the edge of the cylinder body.

Note 2) In the case of models with 5 and 10 strokes, the auto switch may not turn off due to operating range or two auto switches may turn on simultaneously. Fix auto switches outside 1 to 4 mm further than the values in the table above. (If one auto switch is used, make sure that it turns ON and OFF properly; If two auto switches are used, make sure that both auto switches turn ON.)

Note 3) () in column W denotes the D-A90/A93 dimensions.

Operating Range (mm)

Auto switch model	Bore size			
	6	10	16	20
D-M9□, M9□V D-M9□W, M9□WV D-M9□A, M9□AV	3	3.5	5	6
D-A9□, A9□V	5	6	9	11

* Values which include hysteresis are for guideline purposes only, they are not a guarantee (assuming approximately ±30% dispersion) and may change substantially depending on the ambient environment.

Other than the applicable auto switches listed in "How to Order", the following auto switches can be mounted.

* Normally closed (NC = b contact) solid state auto switches (D-F9G/F9H) are also available. Refer to page 1137 for details.

Auto Switch Mounting

- When tightening the auto switch mounting screw, use a watchmaker's screwdriver with a handle 5 to 6 mm in diameter.

Tightening Torque of Auto Switch Mounting Screw (N·m)

Auto switch model	Tightening torque
D-A9□(V)	0.10 to 0.20
D-M9□(V) D-M9□W(V) D-M9□A(V)	0.05 to 0.15

Note) When used with side ported type, it is not possible to mount the D-A9□V/M9□V type on the side to which the piping is connected.

Specific Product Precautions 1

Be sure to read this before handling the products. Refer to back page 50 for Safety Instructions and pages 3 to 12 for Actuator and Auto Switch Precautions.

Auto Switch Mounting

When installing in close proximity to each other

⚠ Caution

- When the Compact Slide with the D-A9□ or D-M9□ auto switch is used, the auto switches could activate unintentionally if the installed distance is less than the dimension shown in Table (1). Therefore, make sure to provide at least this much clearance. Due to unavoidable circumstances, if they must be used with less distance than the dimensions given in the table below, the cylinders must be shielded. Therefore, affix a steel plate or a magnetic shielding plate (MU-S025) to the area on the cylinder that corresponds to the adjacent auto switch. (Please contact SMC for details.) The auto switch could activate unintentionally if a shielding plate is not used.

Table (1) (mm)

Bore size (mm)	d	L
MXH6	5	21
MXH10	5	25
MXH16	10	35
MXH20	15	47

Dimensions of a shielding plate (MU-S025) that is sold separately are indicated as reference.

Material: Ferrite stainless steel, Thickness: 0.3 mm
Since the back side is treated with adhesive, it is possible to attach to the cylinder.

Operating Precautions

⚠ Warning

Be aware that smoking cigarettes etc., after your hands have come into contact with the grease used in this cylinder can create a gas that is hazardous to humans.

⚠ Caution

- Do not place your fingers in the clearance between the non-rotating plate and the cylinder tube. Your fingers could get caught between the table and the cylinder tube when the piston rod retracts. If fingers are caught in a cylinder, there is a danger of injury due to the strong cylinder output, and therefore, caution must be exercised.
- In terms of the work load and moment, operate the cylinder below the maximum work load and allowable moment.
- If the output of the Compact Slide is applied directly to the table, make sure it is applied along the rod axial line. (Refer to the figure below.)

Operating Precautions

- Make sure to connect a speed controller and adjust it to a speed of 500 mm/s or less to operate the cylinder.
- If the vibration of the workpiece due to cylinder operation is clearly noticeable, recheck the operating conditions. Even when the moment applied to the product is under the allowable moment, the vibration width may be increased if a large amount of eccentric load is applied.

Operating Direction with Different Pressure Ports

⚠ Caution

- The Compact Slide can be piped in 3 directions. Check the pressure port and the operating direction. (Refer to the figure below.) Change the plug location depending on the application. Confirm that there is no air leakage after changing the plug location. If there is slight leakage, remove the plug, check the seat surface and reassemble.

When changing the port location, please order the following plug. Replacement port plug part number: MXH-P (2 pcs.)

- If the plug is tightened excessively when attaching it to the axial piping of MXH6, it may be in contact with the internal steel ball, causing air leakage. As for the plug tightening guide, make the adjustment so that the plug sunk dimension from the cylinder tube surface is 0 to less than 1 mm.

Backlash in the Stroke Direction

⚠ Caution

- Since the connection between the piston rod and table is a floating mechanism, the table has backlash of 0.15 mm or less in the stroke direction. (Refer to the figure on the right.)

Connecting part of piston rod and table

MXH Series

Specific Product Precautions 2

Be sure to read this before handling the products. Refer to back page 50 for Safety Instructions and pages 3 to 12 for Actuator and Auto Switch Precautions.

Mounting

⚠ Caution

- When tightening threads for the Compact Slide, properly tighten within the specified torque.

How to Mount the Compact Slide

The Compact Slide can be mounted in 4 directions. Make a selection suitable for the applicable machinery and work pieces, etc.

Lateral Mounting (Body through-hole)

Model	Bolt	Maximum tightening torque (N-m)	L1
MXH6	M3 x 0.5	1.1	12.7
MXH10	M4 x 0.7	2.5	15.6

Specific Product Precautions 3

Be sure to read this before handling the products. Refer to back page 50 for Safety Instructions and pages 3 to 12 for Actuator and Auto Switch Precautions.

Mounting

⚠ Caution

- When tightening threads for the Compact Slide, properly tighten within the specified torque.
- When mounting a workpiece on the top of the table, do not screw a bolt in more deeper than the below table L dimension.
If screwing a bolt in more deeper than the L dimension, the edge of the bolt could reach the linear guide and might damage the linear guide.

How to Mount a Workpiece

Work pieces can be mounted on 2 surfaces of the Compact Slide.

Front Mounting

Model	Bolt	Maximum tightening torque (N·m)	L
MXH6	M3 x 0.5	1.1	5.5
MXH10	M4 x 0.7	2.5	7.5
MXH16	M4 x 0.7	2.5	10
MXH20	M5 x 0.8	5.1	11

Top Mounting

Model	Bolt	Maximum tightening torque (N·m)	L
MXH6	M3 x 0.5	1.1	6.5
MXH10	M4 x 0.7	2.5	8
MXH16	M4 x 0.7	2.5	9
MXH20	M5 x 0.8	5.1	9.5

How to Mount a Workpiece

Work pieces can be mounted on 2 surfaces of the Compact Slide.

- Since the table is supported by the linear guide, take care not to apply strong impact or large moment, etc., when mounting work pieces.
- Hold the table when fastening work pieces to it with bolts etc. If the body is held while tightening bolts etc., the guide section will be subjected to a large moment, and there may be a loss of precision.

- For connection with a load having an external support/guide mechanism, select an appropriate connection method and perform careful alignment.
- Use caution, as scratches or nicks, etc., on the sliding parts of the piston rod can cause a malfunction and air leakage.
